New repository

Type to search

Create a new repository

Repositories contain a project's files and version history. Have a project elsewhere? [Import a repository](#).

Required fields are marked with an asterisk (*).

1

General

Owner *

Dhairy-200

Repository name *

Dhairy

Dhairy is available.

Great repository names are short and memorable. How about [supt-pancake?](#)

Description

0 / 350 characters

2

Configuration

Choose visibility *

Choose who can see and commit to this repository.

Public

Add README

READMEs can be used as longer descriptions. [About READMEs](#)

Off

Add .gitignore

.gitignore tells git which files not to track. [About .gitignore files](#)

No .gitignore

Add license

Licenses explain how others can use your code. [About licenses](#)

No license

📄

Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "m Dhairya" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/Dhairya-200/Dhairya.git
git push -u origin main
```

📄

...or push an existing repository from the command line

```
git remote add origin https://github.com/Dhairya-200/Dhairya.git
git branch -M main
git push -u origin main
```

📄
